## AN ELEVATED PATH TO PUREBOND® DECORATIVE INTERIOR PANELS

The Chesapeake Bay Foundation Brock Environmental Center at Pleasure House Point in Virginia has been awarded the LEED Platinum designation and full certification as a Living Building™, the most advanced measure of sustainable building in the world.

Columbia's interior decorative panel solutions allow you to navigate a formaldehyde free course through Living Building Challenge, LEED®, CHPS® and CalGreen building standards.

PureBond® also clears a simple path of assurance to a home owner who would rather chart a no-added formaldehyde course within a kitchen design/remodel.

With over 50 million, formaldehyde-free panels assembled since converting to EPA award winning PureBond® soy based assembly in 2006, Columbia's decorative panels are a solution you can trust.

We also are here to support your legacy with independent, third party supply chain assurance and green building program support including FSC chain of custody certification since 1998.

For your next design project, we encourage you visit us at [www.cfpwood.com](http://www.cfpwood.com).

COLUMBIA SUPPORTS DESIGNERS WITH BRANDED PRODUCTS, EXPERTISE AND CERTIFICATION.

Home of PureBond®, MPX®, Radius®, UV Wood, Core®, DesignEdge®, Europly Plus®, Appalachian Traditions panel brands.

In house LEED® AP, BD+C support for Living Building Challenge™ LEED, CHPS, and CalGreen Standards..

Finished and unfinished PureBond® panels are Red List Free and available as FSC® Mix upon demand.

## WHAT ARE YOU CREATING TODAY?

# Seed to Finish for 100 years

Timber Products Company was founded in 1918 to provide the best American wood products to customers day in and day out. We call that 'American to the T' and those values remain strong 100 years later. Our business has grown and evolved, but our values remain the same.

From Seed to Finish, Timber Products is here for you every step of the way.

**CHOOSE FROM A LARGE SELECTION  
OF VENEERS AND CORES**

**RediFinish** - a UV coat protects from scratches

**RediPly** - a hardwood veneer face with a TFL back for cabinetry applications

**Right product. Right size.  
Right location. Right company.**

PENROD currently stocks a large variety of core veneer products at multiple port locations in North America. In fact, PENROD goes to places in the world other companies don't go to for the materials that fulfill the needs of manufacturers.

**PENROD OFFERS:**

Core Veneer  
Various Types of Platforms  
Rotary and Sliced Faces

**PENROD SOURCES PRODUCTS FROM:**

North America • South America  
Asia • Russia • Africa • And beyond

**FIND WHAT YOU NEED WITH PENROD.**

# Not just another pretty sliced veneer face.

**YOU'VE FOUND YOUR BEST SOURCE FOR SLICED VENEER FACES.**

With a great selection of both sliced veneer and lumber from which to choose, St-Raymond Veneers has a tremendous inventory of domestic species—from cherry, maple and red oak to hickory, cedar and walnut—as well as more exotic species such as khaya and sapele, so you can enjoy the quality and convenience of immediate shipment on many products.

**SEE WHAT WE CAN DO FOR YOU.**

**On spec.  
On budget.  
On time.**

**Online.**

Check out the all-new GL Veneer website. Featuring 200+ species of veneer — including specs, prices, and swatches for every sheet. Or choose from over 800 live-edge slabs, air and kiln-dried a minimum of three years, all searchable by size and species. Totally redesigned with “simple search” filtering, one-click purchasing, and 24-hour order tracking, the only thing you’ll recognize about our website is our URL — [glveneer.com](http://glveneer.com)

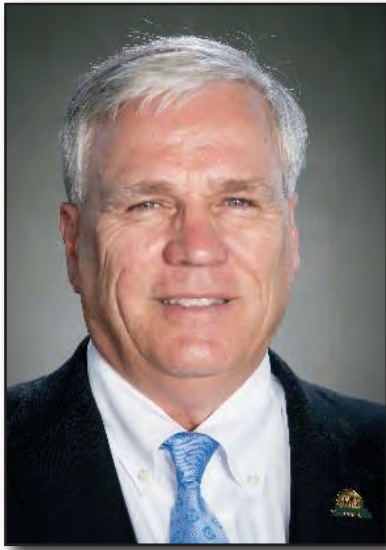

Follow us on Instagram and Facebook.

# INTRODUCTION

Entering our 97<sup>th</sup> year, HPVA has seen historical changes for our industry and its association.

We finally moved into our new, state-of-the-art, 15,000 ft<sup>2</sup> testing facility and association office located in Sterling, VA. And, we officially became the **Decorative Hardwoods Association**. This name change will better describe our diverse membership of North American hardwood plywood, engineered wood flooring and hardwood veneer manufacturers. HPVA Laboratories will also be making a name change this year and become **Capital Testing and Certification Services** and will continue to be the recognized experts in engineered hardwood products.

2017 ended with a great win for the U.S hardwood plywood industry. The illegal trade of dumped Chinese products that unfairly competed with our industry has finally been addressed.

This 2018 edition of **Where To Buy** showcases all our members, their products, their locations, and the contacts needed to make American made, certified to American standards, easy to specify and purchase. These American engineered hardwoods are the natural beauty you can count on and trust.

HPVA will continue as the sponsor of 3 national consensus standards for hardwood plywood (ANSI/HPVA HP-1-2016), engineered wood flooring (ANSI/HPVA EF 2012), and a due diligence management system for sourcing legal timber (ANS LTDD 1.0 2015).

# CUT/MADE-TO-SIZE HARDWOOD PLYWOOD

**Hardwood plywood cut-to-size and made-to-size by the manufacturer is used for furniture, cabinet components, and specialty products.**

Variety of shapes and sizes available.

Can be machined to meet customer needs.

Eliminates the need to purchase and maintain expensive machinery.

Reduces waste, inventory, and labor costs and simplifies just-in-time sourcing.

Customized product increases efficiency and yield.

Grand Prize Winner of Veneer Tech Craftsman's Challenge 2017 is Keith Morgan of Bespoke for "Regency Circular Office." He was awarded \$3000. The project's material distributor, Certainly Wood, was awarded \$2000, and sales representative Greg Engle was awarded \$1000. The panels are crafted in amboyna burl with walnut trim and crown molding. The cabinets are also crafted in walnut.

# ENGINEERED HARDWOOD FLOORING

Easy to install and maintain.

Economical solution for renovating areas or replacing existing flooring.

Adds warmth and beauty to any room.

Dimensionally stable.

Tight tolerances for consistent fit.

Engineered for strength and stability.

Architectural Woodworking Winner of Veneer Tech Craftsman's Challenge 2017 is Mark Bernhard of Bernhard Woodwork Ltd. Unique veneer was picked out to set off the stark white modernist design.

Kewazinga and Karelian Birch were used on the serpentine walls that featured pivot doors and partitions flush into the face of the paneling.

Cabinetry Winner of Veneer Tech Craftsman's Challenge 2017 is Fritz Cabinetry & Furniture. Their goal was to manufacture all panels, cabinetry, casework, and furniture from a single flitch (log) so to create a uniform color throughout the residence. Quartered Tropical Olive, horizontal grained, is the primary species used, followed by Quartered Austrian Walnut and Quartered Figured Movingue.

## Facts About Decorative Hardwood Veneers

### Types of Veneer Cuts

Depending on the manner in which a log is cut, strikingly different visual effects can be achieved with the wood's grain and characteristics. This is the beauty of working with hardwood veneer - that two logs of the same species, cut in different ways, produce distinctive, individual veneers! Six principal methods of cutting veneer are used: rotary, quarter slicing, plain slicing, rift-cut, half-round slicing and lengthwise slicing.

#### Rotary

Rotary veneer is produced by centering the log in a lathe and turning it against a broad cutting knife which is set into the log at a slight angle. Rotary cut veneer can be sufficiently wide to provide full sheet (one piece) faces.

#### Quarter Slicing

Quarter sliced veneer achieves a straight grain appearance by slicing approximately perpendicular to the annual growth rings.

#### Plain Slicing

Plain sliced veneer is veneer sliced parallel to the center of the log to achieve flat-cut veneer. The cathedrals are formed by the inner most growth rings as the veneer is cut through the flitch.

#### Rift-Cut

Rift-cut veneer is produced from the various species of oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel. This straight grain cut is at a slight angle to the medullary rays to minimize ray fleck (flake).

#### Half-Round Slicing

Half-round slicing is cutting on an arch roughly parallel to the center of the log to achieve flat-cut veneer. The cathedrals can have more rounded tops since the grain is formed by the inner most growth rings as the veneer is cut through the flitch.

#### Lengthwise Slicing

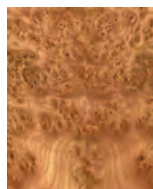

A board of flat sawn lumber is passed flat over a stationary knife. As it passes, a sheet of veneer is sliced from the bottom of the board. This produces a variegated figure.

### Figure Characteristics of Veneers

The figure of the face veneer is of the utmost importance to the designer and architect, because the whole character of the completed installation may be determined by the choice of veneer to be used. When discussing figure in wood, those who deal with veneer usually describe the characteristics of the "movement" in the wood - whether it has wide or narrow heart, cathedral, crossfire, or is highly figured. Some of the more commonly used veneers are illustrated below.

Cherry,  
American Black

Elm,  
Carpathian Burl

Maple,  
Hard

Oak,  
Rift-Cut

Walnut,  
Quartered

*Our thanks to Sieling and Jones, Inc. for the photographs of veneer.*

# HARDWOOD PLYWOOD STOCK PANELS

Hardwood plywood stock panels are manufactured in standard sizes such as 4' x 8' or 4' x 10' & are commonly 1/4" to 3/4" in thickness. Stock panels are available through distribution centers for industrial users or through mass merchandisers for commercial & do-it-yourself customers. Frequently cut to component size by the end user.

Consistent quality.

Diverse selection of species.

Strong and dimensionally stable.

A variety of cores: veneer, MDF, particleboard, lumber, and combi- core.

Can be obtained finished.

Student Design Winner of Veneer Tech Craftsman's Challenge 2017 is John Kruis, Thaddeus Stevens College of Technology, Lancaster, Pennsylvania for "Rhode Island Federal Serpentine Chest of Drawers." It features mahogany crotch veneer and mahogany straight grain veneer.

## MANUFACTURERS OF HARDWOOD PLYWOOD STOCK PANELS

**SPECIES:** R-Rotary, H-Half Round, P-Plain Sliced, Q-Quarter Sliced, I-Rift Cut

**GLUE TYPES:** CARB – California Air Resources Board; Exterior – Technical; Exterior – Type I; Interior – Type II; NAF – No Added Formaldehyde; NAUF – No Added Urea Formaldehyde; Phenolic – Phenol Formaldehyde; PVA – Polyvinyl Acetate

# A RENAISSANCE IN VENEER SOURCING CONFIDENCE

# ROTARY HARDWOOD VENEERS

The grain pattern varies from log to log, making each piece its own natural unique piece of art.

Wide variety of species available.

Maximizes the usable veneer taken from each tree.

Ability to select a specific flitch or “look.”

By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

**For more information, read "Facts About Decorative Veneers" listed in the Table of Contents.**

Furniture Winner of Veneer Tech Craftsman's Challenge 2017 is Joe Morgan of J. Morgan Woodworking for "Labyrinth Table". The top, column and base on this table were all faced using commercial veneers. The edging that was glued around the table top and base were from shop sawn veneer.

# SLICED HARDWOOD VENEERS

Beautiful heart structure and uniformity of appearance.

Smooth surface.

Ability to select a specific flitch or “look.”

Wide variety of species available.

Sliced veneer gives a unique and sophisticated touch to your product.

By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

**For more information, read "Facts About Decorative Veneers" listed in the Table of Contents.**

Marquetry Winner of Veneer Tech Craftsman's Challenge 2017 is "Two blondes and a Brioche at the Bistro" by Silas Kopf of Silas Kopf Woodworking. While the dog is fundamentally yellow, a variety of woods were needed to make the picture come to life. At least half a dozen different yellows were used to make the shading.

# SPLICED HARDWOOD VENEERS

Environmentally friendly.

Made to standards agreed upon between buyer and seller - grade, craftsmanship, etc.

Continuity from order to order.

Cost control.

For more information, read "Facts About Decorative Veneers" listed in the Table of Contents.

Speciality Items Winner of Veneer Tech Craftsman's Challenge 2017 is Joseph Mendel of Joseph Mendel Furniture Maker for his "Federal Styled Game Table." This furniture style is highlighted by the inclusion of shaded veneers, parquetry, inlaid banding, the use of crotch cut veneers, cross banding, quadrant fans, and line and berry geometric inlays.

# DECORATIVE HARDWOODS Association

## THE MISSION OF THE DECORATIVE HARDWOODS ASSOCIATION,

formerly known as the Hardwood Plywood & Veneer Association, is to promote and support high quality, sustainably and legally produced decorative engineered wood products and hardwood veneer manufactured in North America.

## OUR CORE VALUES

- Our unique strength is our depth and breadth of technical expertise in engineered hardwoods
- Our marketing of North American-produced engineered hardwoods drives consumer preference
- The Decorative Hardwoods Association is the single voice of our industry, advocating for a fair market and level playing field
- We actively collaborate to promote the sustainable management of forest resources and access to legally sourced timber
- Our national consensus standards for hardwood plywood, engineered wood flooring, and due diligence for sourcing legal timber are recognized and specified by producers and consumers

To become a member, advertise with us, or buy publications, contact:

**703.435.2900**

[www.DecorativeHardwoods.org](http://www.DecorativeHardwoods.org)

## HPVA LABORATORIES® IS THE TESTING AND CERTIFICATION ARM OF THE DECORATIVE HARDWOODS ASSOCIATION.

The experienced scientists and technicians at HPVA Laboratories® (soon to be Capital Testing & Certification Services®) have been testing and certifying products and processes for conformance with national standards, federal and military specifications, and state and local building codes since 1954. We offer certifications and conduct an extensive list of testing services in our state-of-the-art, 10,000<sup>2</sup> ft facility in Sterling, Virginia, including:

- Emissions Testing for VOCs and Formaldehyde
- Fire, Flame Spread, Toxicity, and Smoke Testing
- Specialized Product Testing
- Legal Timber Lacey Act Certification
- Engineered Wood Products Certification

To find out more about our expert certification and testing services or to request testing, contact:

**703.435.2900**

[www.HPVALaboratories.com](http://www.HPVALaboratories.com)

## HARDWOOD FORESTRY FUND

The Hardwood Forestry Fund, a 501(c)(3) nonprofit, was created by our industry to plant the next 100 years of sustainably managed, harvestable hardwoods.

To date, our donors have helped us to plant over 5 million trees – American walnut, oak, black cherry, and more – on 7,000 acres of public land.

Hardwood Forestry Fund grants enable dedicated, experienced forest professionals to create detailed forest management plans and educate visitors to ensure our forests thrive. We focus on areas where nature struggles to replant on its own. Abandoned coal mines, deserted farms, and forests decimated by wildfire have all been rebuilt with help from our supporters.

To learn more or to help plant more hardwoods, contact:

**703.435.2900 ext. 106**

### AKZONOBEL WOOD COATINGS (FINISHES & ADHESIVES) (M)

AkzoNobel creates everyday essentials to make people's lives more liveable and inspiring. As a leading global paints and coatings company, we supply essential ingredients, essential protection and essential color to industries and consumers worldwide. Backed by a pioneering heritage, our innovative products and sustainable technologies are designed to meet the growing demands of our fast-changing planet, while making life easier. Headquartered in Amsterdam, the Netherlands, we are present around the globe, while our portfolio includes well-known brands such as Dulux, Sikkens, International and Interpon. Consistently ranked as a leader in sustainability, we are dedicated to energizing cities and communities while creating a protected, colorful world where life is improved by what we do.

**AkzoNobel Wood Finishes:** for nearly 200 years, the world's leading manufacturers of cabinetry, furniture, building products and flooring have depended on AkzoNobel Wood finishes to beautify and protect their products.

**AkzoNobel Wood Adhesives,** a division of AkzoNobel Wood Coatings: for over 80 years, we've provided the innovative and market-leading wood adhesives.

### **MEINAN MACHINERY WORKS, INC. (M)**

Meinan Machinery Works, Inc. excels in research and development of innovative machinery, beginning in 1955 with the invention of the wide belt sander. The newest sander, a Challenger's Award finalist at IWF 2010, is the wide belt wet sander for 100% dust-free sanding of finished panels.

The Meinan veneer composer was introduced in 1970 to join random widths of veneer ahead of the lay-up process. The newest model, the TEC composer, is the world's only successful tape composer for random green veneer, creating full size veneer sheets from short random widths. The heat-proof paper tape increases dryer utilization by drying full size sheets instead of veneer strips.

Meinan's Aristo-Lathe™ veneer peeling lathe drives logs on the circumference rather than with spindles, making truly spindleless peeling at the log core possible by utilizing a special backup roll system and a unique series of powered spiked discs that provide the driving force on the knife carriage. Over 270 Meinan lathes have been installed worldwide, providing better veneer quality, higher yield, and extremely close thickness tolerance. The newest lathe, model NAL, is part of a fully automatic peeling line requiring only supervisory personnel, resulting in significant labor cost savings. The line features a computerized log charger, automatic knife changer, and Dream Clipper™ to rapidly and continuously clip and stack veneer. Represented in the USA by Merritt Machinery.

### **NUMATIC FINISHING CORP. (M)**

Numatic Finishing is a full architectural wood pre-finishing plant, finishing doors, millwork, paneling, and casework. They do all types of wood finishes including: wood treat, preservative treat, fire treat, custom stains and finishes also priming and painting. They work with the architects, designers, and owners to help develop and design custom colors and finishes. They are fully automated with two millwork flat-lines, an automated door line curing under infrared heat; and two areas for those hot samples or rush orders. In 1999, they purchased their first UV flat-line, since then they have added a new UV finishing line with stain module, wiping systems, three sanders, and now offer UV vacuum coating on millwork, both the UV flat-line and UV vacuum coater apply finishes that are LEED qualified.

### SOLENIIS LLC (M)

Solenis is a global leader in specialty chemical solutions for consumer and industrial markets. The company's Soyad™ adhesive technology is a patented, formaldehyde-free adhesive system that is widely used to manufacture environmentally-friendly hardwood plywood and engineered wood flooring. Soyad™ adhesives are used to produce boards with veneer or composite panel cores. The strength provided by Soyad™ adhesives is comparable to that of formaldehyde-based adhesives. Soyad™ adhesives are cost competitive with formaldehyde-based adhesives and, in most cases, cost less than other no-added-formaldehyde (NAF) technologies.

# Helping you make it in today's world.

## **Innovative Solutions for the Forest Products Industry.**

Hexion is a world leader in supplying resins, adhesives, wax emulsions, and ancillary products to the forest products industry. We meet the most challenging applications with a complete package of innovative, cost-effective solutions. We're also at the forefront in developing environmentally suitable technologies for reduced emissions.

### ***Product Lines***

- Urea Resins
- Melamine Resins
- Phenolic Resins
- Phenol-Resorcinol Resins
- PVA Adhesives –  
Conventional and  
Cross Link
- Casein Adhesives
- EcoBind™ Ultra-low  
Emitting Resin and  
Adhesive Technologies
- EPI Adhesives
- HRA Technology  
(Heat Rated Adhesives)

### ***Applications***

- Veneer Splicing ▪ Composite  
Panels ▪ Hardwood Plywood
- Softwood Plywood ▪ Furniture
- Laminating ▪ Saturating
- All Woodworking Applications
- Fingerjointing – Structural and  
Non-structural Adhesives

### ***Sales Offices***
