AN ELEVATED PATH TO PUREBOND® FORMALDEHYDE FREE INTERIOR PANELS

PureBond provides CARB Exempt, EPA TSCA Title VI compliant decorative panel solutions for commercial or residential clients who value resilience and wish to chart a no-added formaldehyde course within a building or remodel design.

The Environmental Center at Pleasure House Point in Virginia was awarded the LEED Platinum designation and full certification as a Living Building™, both advanced measures of responsible building construction. Columbia's Purebond panels were the natural choice for the formaldehyde-free course set by the project team with build-outs including a kitchenette (insert, right)

PureBond® remains a transformational "Breath of Fresh Thinking", based on biomimicry mussel protein research which led to replacement of formaldehyde by soy protein as a primary bonding ingredient. With

over a hundred million decorative panels assembled since 2006, Purebond is an established formaldehyde free solution, providing architects, designers and fabricators a means to actively deselect added formaldehyde and its attendant supply chain risks.

We are here to help you pilot your legacy with independent, third party supply chain assurance and green building program support including LEED®, Living Building Challenge™ and Declare® program disclosures. Red List Free disclosure and FSC® Mix panels available at time of order placement through extensive chain-of-custody distribution.

When mapping out your next project voyage, count on us here at Columbia Forest Products to crew. Broadest decorative panel lines, world class technologies all based in the United States, Canada and now Ecuador.

YOUR SUPPLIER OF CHOICE.

Home of PureBond®, MPX®, Touchwood®, UV Wood, EuroplyPlus®, ClassicCore®, Radius® and Appalachian Traditions exclusively.

Unmistakable, natural look and feel of authentic, real wood veneers in 40 decorative species 10' panel dimensions and 4' counter front options available.

Finished and unfinished veneer core PureBond® panels are Declare®, Red List Free, available as FSC® Mix upon demand.

Not just another pretty sliced veneer face.

YOU'VE FOUND YOUR BEST SOURCE FOR SLICED VENEER FACES.

With a great selection of both sliced veneer and lumber from which to choose, St-Raymond Veneers has a tremendous inventory of domestic species—from cherry, maple and red oak to hickory, cedar and walnut—as well as more exotic species such as khaya and sapele, so you can enjoy the quality and convenience of immediate shipment on many products.

SEE WHAT WE CAN DO FOR YOU.

We're the name behind the solutions

Helping manufacturers put it together...

For over 75 years, Franklin has produced wood adhesives to support the furniture, millwork, flooring, plywood and cabinet industries in wood assembly, solid edge and face gluing, engineered product lamination and finger jointing.

Join in the conversation at
www.FranklinAdhesivesandPolymers.com

A vast forest of over 200 species. All under one roof.

We'll take you on a tour through our 160,000 sq.ft. warehouse any time. Not just to explain all the wood in our 40+ year collection. But to make sure you can find your way out. From Afromosia to Ziricote, you'll discover nearly 20,000,000 sq.ft. of eye-stopping veneer — in every grain, cut, and figure imaginable. Row after row of project-ready live edge slabs, air- and kiln-dried 3 years to vintage perfection. All of it ready to buy, over the phone or online, on our easy-to-use website. Order by noon, you'll have it by tomorrow.

INTRODUCTION

Entering our 98th year, The Decorative Hardwoods Association has seen historical changes beginning with our new name. The Decorative Hardwoods Association better describes our diverse membership of North American hardwood plywood, engineered wood flooring and hardwood veneer manufacturers.

We are fully operational in our new 15,000 square foot state of the art testing facility and association offices located in Sterling, VA next to Dulles International Airport this year. HPVA labs will change to Capital Testing and Certification Services this year and will continue to be the recognized experts in engineered hardwood products. Our new website has launched setting record visitors. The biweekly eNews reaches 12,000 readers with diverse, pertinent news tailored for our industry and its customers. This 2019 edition of **Where to Buy** showcases all our members, their products, their locations, and their contacts. This award-winning directory makes it easy to specify and purchase American made, certified to American standards. These American engineered hardwood products are the natural beauty that you can trust.

HPVA will continue as the sponsor of 3 national consensus standards for hardwood plywood (ANSI/HPVA HP-1-2016), engineered wood flooring (ANSI/HPVA EF 2012), and a due diligence management system for sourcing legal timber (ANS LTDD 1.0 2015).

CUT/MADE-TO-SIZE HARDWOOD PLYWOOD

Hardwood plywood cut-to-size and made-to-size by the manufacturer is used for furniture, cabinet components, and specialty products.

- Versatile: variety of shapes and sizes available.
- Can be machined to meet customer needs.
- Eliminates the need to purchase and maintain expensive machinery.
- Reduces waste, inventory, and labor costs.
- Simplifies just-in-time sourcing.
- Customized product increases efficiency and yield.

PREFINISHED HARDWOOD PLYWOOD

**Hardwood plywood that is factory finished by the manufacturer.
Available in various veneer species, colors, overlays, finishes, and patterns.
For retail and industrial applications.**

- Consistent quality.
- Strong and dimensionally stable.
- Available in thicknesses from 1/10" to over 2".
- Lowers finish cost.
- Extremely durable.

Cabinetry Winner of Veneer Tech Craftsman's Challenge 2018 is *Royal Ebony TV Cabinet* by Matthew Chase Woodworks.

At Timber Products Company we have a laser focus on every detail that goes into manufacturing the highest quality wood panel products. Our goal is to provide

you with unparalleled solutions and extraordinary panel products that define a room and its elements. Nothing compares to the timeless beauty of natural wood.

**Real Beauty.
Real Quality.
Real Wood.**

Timber Products Company

THE TREMENDOUS RESOURCE®

1-800-547-9520 | timberproducts.com

HARDWOOD PLYWOOD STOCK PANELS

Hardwood plywood stock panels are manufactured in standard sizes such as 4' x 8' or 4' x 10' and are commonly 1/4" to 3/4" in thickness. Stock panels are available through distribution centers for industrial users or through mass merchandisers for commercial and do-it-yourself customers. They are frequently cut to component size by the end user.

- Consistent quality.
- Diverse selection of species.
- Strong and dimensionally stable.
- A variety of cores: veneer, MDF, particleboard, lumber, and combination core.
- Can be obtained finished.

Grand Prize Winner of Veneer Tech Craftsman's Challenge 2018 is *Tilt* by Jamie Herman / Vermont Woodworking School Certainly Wood, Supplier — Greg Engle, Sales Representative

Facts About Decorative Hardwood Veneers

Types of Veneer Cuts

Depending on the manner in which a log is cut, strikingly different visual effects can be achieved with the wood's grain and characteristics. This is the beauty of working with hardwood veneer - that two logs of the same species, cut in different ways, produce distinctive, individual veneers!

Six principal methods of cutting veneer are used: rotary, quarter slicing, plain slicing, rift-cut, half-round slicing and lengthwise slicing.

Rotary

Rotary veneer is produced by centering the log in a lathe and turning it against a broad cutting knife which is set into the log at a slight angle. Rotary cut veneer can be sufficiently wide to provide full sheet (one piece) faces.

Quarter Slicing

Quarter sliced veneer achieves a straight grain appearance by slicing approximately perpendicular to the annual growth rings.

Plain Slicing

Plain sliced veneer is veneer sliced parallel to the center of the log to achieve flat-cut veneer. The cathedrals are formed by the inner most growth rings as the veneer is cut through the flitch.

Rift-Cut

Rift-cut veneer is produced from the various species of oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel. This straight grain cut is at a slight angle to the medullary rays to minimize ray fleck (flake).

Half-Round Slicing

Half-round slicing is cutting on an arch roughly parallel to the center of the log to achieve flat-cut veneer. The cathedrals can have more rounded tops since the grain is formed by the inner most growth rings as the veneer is cut through the flitch.

Lengthwise Slicing

A board of flat sawn lumber is passed flat over a stationary knife. As it passes, a sheet of veneer is sliced from the bottom of the board. This produces a variegated figure.

Figure Characteristics of Veneers

The figure of the face veneer is of the utmost importance to the designer and architect, because the whole character of the completed installation may be determined by the choice of veneer to be used. When discussing figure in wood, those who deal with veneer usually describe the characteristics of the "movement" in the wood - whether it has wide or narrow heart, cathedral, crossfire, or is highly figured.

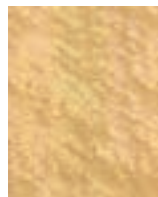

Some of the more commonly used veneers are illustrated below.

Cherry,
American Black

Elm,
Carpathian Burl

Maple,
Hard

Oak,
Rift-Cut

Walnut,
Quartered

Our thanks to Sieling and Jones, Inc. for the photographs of veneer.

A RENAISSANCE IN VENEER SOURCING CONFIDENCE

ROTARY HARDWOOD VENEERS

- The grain pattern varies from log to log, making each piece its own natural unique piece of art.
- Wide variety of species available.
- Maximizes the usable veneer taken from each tree.
- Ability to select a specific flitch or “look.”
- By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: *Facts About Decorative Veneers* listed in the Table of Contents.

Student Design Winner of Veneer Tech Craftsman's Challenge 2018 is *Unveiling* by Cooper Feiner-Homer / Vermont Woodworking School.

SLICED HARDWOOD VENEERS

- Beautiful heart structure.
- Uniformity of appearance.
- Smooth surface.
- Ability to select a specific flitch or “look.”
- Wide variety of species available.
- Sliced veneer gives a unique and sophisticated touch to your product.
- By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: *Facts About Decorative Veneers* listed in the Table of Contents.

Marquetry Winner of Veneer Tech Craftsman's Challenge 2018 is *Just the Essentials* by Shaun Fleming / Wooden Touches L.L.C.

Phenol Resorcinol Formaldehyde
Melamine Formaldehyde
Melamine-Urea Formaldehyde
PVAc: Type I, II, III
PUR

Applications:

Assembly gluing
Boat (marine uses)
Edge gluing
Exterior and interior plywood
Film and paper overlays
Finger jointing
Flooring
Flush doors
I-joists
Laminated timber
Panel to frame
Scarf jointing
Window scantling

CARGILL INDUSTRIAL SPECIALTIES

Cargill provides food, agriculture, financial and industrial products and services to the world. Together with farmers, customers, governments and communities, we help people thrive by applying our insights and more than 150 years of experience. We have 150,000 employees in 70 countries who are committed to nourishing the world in a responsible way, reducing environmental impact and improving the communities where we live and work.

Cargill Industrial Specialties is the largest business unit within Cargill that exclusively focuses on providing bio-based solutions to industrial markets, including binders and adhesives for construction materials, dielectric fluids, paints, inks and coatings, lubricants, oilfield chemicals, consumer products, flexible foam and other diverse applications in the chemical industry. With our extensive specialty chemical technical expertise, we collaboratively work with our customers to solve their toughest challenges with unique, innovative technologies that create bottom-line value. Furthermore, our customers count on Cargill's global supply chain expertise to provide consistent and reliable supply.

MEINAN MACHINERY WORKS, INC. (M)

Meinan Machinery Works, Inc. excels in research and development of innovative machinery, beginning in 1955 with the invention of the wide belt sander. The newest sander, a Challenger's Award finalist at IWF 2010, is the wide belt wet sander for 100% dust-free sanding of finished panels.

The Meinan veneer composer was introduced in 1970 to join random widths of veneer ahead of the lay-up process. The newest model, the TEC composer, is the world's only successful tape composer for random green veneer, creating full size veneer sheets from short random widths. The heat-proof paper tape increases dryer utilization by drying full size sheets instead of veneer strips.

Meinan's Aristo-Lathe™ veneer peeling lathe drives logs on the circumference rather than with spindles, making truly spindleless peeling at the log core possible by utilizing a special backup roll system and a unique series of powered spiked discs that provide the driving force on the knife carriage. Over 270 Meinan lathes have been installed worldwide, providing better veneer quality, higher yield, and extremely close thickness tolerance. The newest lathe, model NAL, is part of a fully automatic peeling line requiring only supervisory personnel, resulting in significant labor cost savings. The line features a computerized log charger, automatic knife changer, and Dream Clipper™ to rapidly and continuously clip and stack veneer. Represented in the USA by Merritt Machinery.

NUMATIC FINISHING CORP. (M)

Numatic Finishing is a full architectural wood pre-finishing plant, finishing doors, millwork, paneling, and casework. They do all types of wood finishes including: wood treat, preservative treat, fire treat, custom stains and finishes also priming and painting. They work with the architects, designers, and owners to help develop and design custom colors and finishes. They are fully automated with two millwork flat-lines, an automated door line curing under infrared heat; and two areas for those hot samples or rush orders. In 1999, they purchased their first UV flat-line, since then they have added a new UV finishing line with stain module, wiping systems, three sanders, and now offer UV vacuum coating on millwork, both the UV flat-line and UV vacuum coater apply finishes that are LEED qualified.

SOLENIS LLC (M)

Solenis is a global leader in specialty chemical solutions for consumer and industrial markets. The company's Soyad™ adhesive technology is a patented, formaldehyde-free adhesive system that is widely used to manufacture environmentally-friendly hardwood plywood and engineered wood flooring. Soyad™ adhesives are used to produce boards with veneer or composite panel cores. The strength provided by Soyad™ adhesives is comparable to that of formaldehyde-based adhesives. Soyad™ adhesives are cost competitive with formaldehyde-based adhesives and, in most cases, cost less than other no-added-formaldehyde (NAF) technologies.

Enabling Engineered Wood Products

Innovative Solutions for the Engineered Wood Products Industry.

Hexion is a world leader in supplying resins, adhesives, wax emulsions, and ancillary products to the engineered wood and hardwood veneer products industries. We meet the most challenging applications with a complete package of innovative, cost-effective solutions. We're also at the forefront in developing environmentally suitable technologies for reduced emissions.

Product Lines

- Urea Resins
- Melamine Resins
- Phenolic Resins
- Phenol-Resorcinol Resins
- PVA Adhesives –Conventional and Cross Link
- Casein Adhesive
- EcoBind™ Ultra-low Emitting Resin and Adhesive Technologies
- EPI Adhesive
- HRA Technology (Heat Rated Adhesives)

Applications

- Veneer Splicing
- Composite
- Panels
- Hardwood Plywood
- Furniture
- Laminating
- Saturating
- All Woodworking Applications
- Fingerjointing – Structure and Non-structural Adhesives

Sales Offices

DECORATIVE HARDWOODS Association

THE MISSION OF THE DECORATIVE HARDWOODS ASSOCIATION,

formerly known as the Hardwood Plywood & Veneer Association, is to promote and support high quality, sustainably and legally produced decorative engineered wood products and hardwood veneer manufactured in North America.

OUR CORE VALUES

- Our unique strength is our depth and breadth of technical expertise in engineered hardwoods
- Our marketing of North American-produced engineered hardwoods drives consumer preference
- The Decorative Hardwoods Association is the single voice of our industry, advocating for a fair market and level playing field
- We actively collaborate to promote the sustainable management of forest resources and access to legally sourced timber
- Our national consensus standards for hardwood plywood, engineered wood flooring, and due diligence for sourcing legal timber are recognized and specified by producers and consumers

To become a member, advertise with us, or buy publications, contact:

703.435.2900

CAPITAL TESTING™ IS THE TESTING AND CERTIFICATION ARM OF THE DECORATIVE HARDWOODS ASSOCIATION.

The experienced scientists and technicians at Capital Testing™ (formerly HPVA Laboratories®) have been testing and certifying products and processes for conformance with national standards, federal and military specifications, and state and local building codes since 1954. We offer certifications and conduct an extensive list of testing services in our state-of-the-art, 10,000 ft² facility in Sterling, Virginia, including:

- Emissions Testing for VOCs and Formaldehyde
- Fire, Flame Spread, Toxicity, and Smoke Testing
- Specialized Product Testing
- Legal Timber Lacey Act Certification
- Engineered Wood Products Certification

To find out more about our expert certification and testing services or to request testing, contact:

703.435.2900

www.CapitalTesting.org

HARDWOOD FORESTRY FUND

The Hardwood Forestry Fund, a 501(c)(3) nonprofit, was created by our industry to plant the next 100 years of sustainably managed, harvestable hardwoods.

To date, our donors have helped us to plant over 5 million trees – American walnut, oak, black cherry, and more – on 7,000 acres of public land.

Hardwood Forestry Fund grants enable dedicated, experienced forest professionals to create detailed forest management plans and educate visitors to ensure our forests thrive. We focus on areas where nature struggles to replant on its own. Abandoned coal mines, deserted farms, and forests decimated by wildfire have all been rebuilt with help from our supporters.

To learn more or to help plant more hardwoods, contact:

703.435.2900 ext.106

www.HardwoodForestryFund.org

A GOOD FEELING

There are lots of reasons to work with Danzer. Like access to best-in-the-industry experts. Quality wood products delivered how and when you need them. Innovations that help you stand out. And the peace of mind that keeps you focused on business. When you partner with Danzer, the feeling's good. For good reasons. www.danzer.com
