WHERE TO BUY
HARDWOOD PLYWOOD, VENEER, & ENGINEERED HARDWOOD FLOORING

Decorative Hardwoods Association
Membership Directory
www.decorativehardwoods.org
Formerly the Hardwood Plywood & Veneer Association™
IT’S COLUMBIA LIKE YOU’VE NEVER SEEN US BEFORE.

You’ve known us as a leading supplier of hardwood veneer and plywood. We invite you to know us for the other capabilities, materials and solutions we’re bringing to all corners of the wood processing and wood working markets.

Columbia Platforms

• Assembled in the USA and Canada
• FSC® Mix available on request [FSC®-C017500]
• TSCA Title VI compliant
• Available in a range of thicknesses, widths & lengths as well as cross-grain, long-grain, and unidirectional.
• Domestic and import core options to meet various price points

Pachaco/Gmelina Core Veneer

• Columbia Forest Products is the plantation manager, manufacturer, sales agent, and importer of record
• Meinan® Lathe Core Veneer
  - Strict and reliable thickness tolerances
  - Quality of cut delivers consistently smooth veneer
  - Gangi drive results in flexible veneer with less tension
• Optimized planting and harvest schedule for long-term growth and reliable fiber supply

Rice Straw MDF

• Manufactured in California
• Formaldehyde-free
• Revolutionary fiber source from a 25-mile radius around the state-of-the-art production facility
• 2mm to 30 mm thicknesses
• Densities from Ultralight to HDF

Danzer is close to you, and close to the source. Our experts understand their business and know where to procure sustainable hardwood that is right for you. We are committed to your specific needs and provide you with tailored solutions that ensure your success every time. www.danzer.com
States Industries LLC brings the beauty and warmth of natural hardwoods and premium softwoods to architects, craftsmen and consumers. Designers and manufacturers of cabinets, furniture, casework and store fixtures depend on States hardwood panels to create beautiful, durable and environmentally responsible products.
PENROD currently stocks a large variety of core veneer products at multiple port locations in North America. In fact, PENROD goes to places in the world other companies don't go to for the materials that fulfill the needs of manufacturers.

**PENROD OFFERS:**
- Core Veneer
- Various Types of Platforms
- Rotary and Sliced Faces

**PENROD SOURCES PRODUCTS FROM:**
- North America
- South America
- Asia
- Russia
- Africa
- And beyond

**FIND WHAT YOU NEED WITH PENROD.**

---

**Not just another pretty sliced veneer face.**

**YOU’VE FOUND YOUR BEST SOURCE FOR SLICED VENEER FACES.**

With a great selection of both sliced veneer and lumber from which to choose, St-Raymond Veneers has a tremendous inventory of domestic species—from cherry, maple and red oak to hickory, cedar and walnut—as well as more exotic species such as khaya and sapele, so you can enjoy the quality and convenience of immediate shipment on many products.

**SEE WHAT WE CAN DO FOR YOU.**

THE MISSION OF THE DECORATIVE HARDWOODS ASSOCIATION,

formerly known as the Hardwood Plywood & Veneer Association, is to promote and support high quality, sustainably and legally produced decorative engineered wood products and hardwood veneer manufactured in North America.

OUR CORE VALUES

- Our unique strength is our depth and breadth of technical expertise in engineered hardwoods
- Our marketing of North American-produced engineered hardwoods drives consumer preference
- The Decorative Hardwoods Association is the single voice of our industry, advocating for a fair market and level playing field
- We actively collaborate to promote the sustainable management of forest resources and access to legally sourced timber
- Our national consensus standards for hardwood plywood, engineered wood flooring, and due diligence for sourcing legal timber are recognized and specified by producers and consumers

To become a member, advertise with us, or buy publications, contact:

www.DecorativeHardwoods.org
Hardwood Forestry Fund

The Hardwood Forestry Fund, a 501(c)(3) nonprofit, was created by our industry to plant the next 100 years of sustainably managed, harvestable hardwoods.

To date, our donors have helped us to plant over 4 million trees – American walnut, oak, black cherry, and more – on 6,000 acres of public land.

Hardwood Forestry Fund grants enable dedicated, experienced forest professionals to create detailed forest management plans and educate visitors to ensure our forests thrive. We focus on areas where nature struggles to replant on its own. Abandoned coal mines, deserted farms, and forests decimated by wildfire have all been rebuilt with help from our supporters.

To learn more or to help plant more hardwoods, contact:
706-340-5916 or hardwoodforestryfund@gmail.com
www.HardwoodFund.org
INTRODUCTION

The Decorative Hardwoods Association has made it to a historic milestone: our 99th Anniversary. This directory of our members describes our diverse membership of North American hardwood plywood, engineered wood flooring and hardwood veneer manufacturers.

* Warm natural beauty * Sustainably sourced * Safe * Legal

This 2020 edition of Where to Buy showcases all our members, their products, their locations, and their contacts. This award-winning directory makes it easy to specify and purchase American-made, certified to American standards, engineered hardwood products. Natural beauty that you can trust.

Our new 15,000-square-foot state-of-the-art testing facility and association offices are located in Sterling, VA next to Dulles International Airport. HPVA Laboratories will change to Capital Testing and Certification Services this year and will continue to be the recognized experts in engineered hardwood products. Our new website has been receiving record numbers of visitors. The biweekly eNews reaches over 12,000 readers with diverse, pertinent news tailored for our industry and its customers. HPVA will continue as the sponsor of three national consensus standards for hardwood plywood (ANSI/HPVA HP-1-2016), engineered wood flooring (ANSI/HPVA EF 2012), and a due diligence management system for sourcing legal timber (ANS LTDD 1.0 2015).

Custom hardwood plywood is our specialty!

A Full Service Plywood Company, we offer:

- Short turnaround time
- In house veneer mill with custom capabilities
- Rotary cut, quarter cut, rift cut and plain sliced
- Over 100 natural & engineered veneers in stock
- Special sizes available up to 5' x 12'
- Thickness ranging from 1/8" to 2"
- Industry leading quality control
- Sanded cross grain panels
- Wire brushing and texturing
- Flexed paperback veneers
- Melamine and high-pressure laminates
- Bending plywood
- 4th generation business - 80 years of knowledge and experience
- Live log online inventory for selection of specific veneer logs

Welcome to the Cutting Edge

The Spectrum Division specializes in value-engineering a full range of custom components to meet your needs. From simple machining and edge treating to ready-to-assemble parts, Spectrum’s CustomCuts program provides options and solutions to increase your efficiency.
CUT/MADE-TO-SIZE HARDWOOD PLYWOOD

Hardwood plywood cut-to-size and made-to-size by the manufacturer is used for furniture, cabinet components, and specialty products.

• Versatile – a variety of shapes and sizes available.
• Can be machined to meet customer needs.
• Eliminates the need to purchase and maintain expensive machinery.
• Reduces waste, inventory, and labor costs.
• Simplifies just-in-time sourcing.
• Customized product increases efficiency and yield.

Facts About Decorative Hardwood Veneers

Types of Veneer Cuts

Depending on the manner in which a log is cut, strikingly different visual effects can be achieved with the wood’s grain and characteristics. This is the beauty of working with hardwood veneer - that two logs of the same species, cut in different ways, produce distinctive, individual veneers!

Six principal methods of cutting veneer are used: rotary, quarter slicing, plain slicing, rift-cut, half-round slicing and lengthwise slicing.

Rotary
Rotary veneer is produced by centering the log in a lathe and turning it against a broad cutting knife which is set into the log at a slight angle. Rotary cut veneer can be sufficiently wide to provide full sheet (one piece) faces.

Quarter Slicing
Quarter sliced veneer achieves a straight grain appearance by slicing approximately perpendicular to the annual growth rings.

Plain Slicing
Plain sliced veneer is veneer sliced parallel to the center of the log to achieve flat-cut veneer. The cathedrals are formed by the inner most growth rings as the veneer is cut through the flitch.

Rift-Cut
Rift-cut veneer is produced from the various species of oak. Oak has medullary ray cells which radiate from the center of the log like the curved spokes of a wheel. This straight grain cut is at a slight angle to the medullary rays to minimize ray fleck (flake).

Half-Round Slicing
Half-round slicing is cutting on an arch roughly parallel to the center of the log to achieve flat-cut veneer. The cathedrals can have more rounded tops since the grain is formed by the inner most growth rings as the veneer is cut through the flitch.

Lengthwise Slicing
A board of flat sawn lumber is passed flat over a stationary knife. As it passes, a sheet of veneer is sliced from the bottom of the board. This produces a variegated figure.

Figure Characteristics of Veneers

The figure of the face veneer is of the utmost importance to the designer and architect, because the whole character of the completed installation may be determined by the choice of veneer to be used. When discussing figure in wood, those who deal with veneer usually describe the characteristics of the “movement” in the wood - whether it has wide or narrow heart, cathedral, crossfire, or is highly figured.

Some of the more commonly used veneers are illustrated below.

Cherry, American Black
Elm, Carpathian Burl
Maple, Hard
Oak, Rift-Cut
Walnut, Quartered

Our thanks to Sieling and Jones, Inc. for the photographs of veneer.

ENGINEERED HARDWOOD FLOORING

• Easy to install and maintain.
• Economical solution for renovating areas or replacing existing flooring.
• Adds warmth and beauty to any room.
• Dimensionally stable.
• Tight tolerances for consistent fit.
• Engineered for strength and stability.

INDUSTRIAL PANELS: Banded/Edge Banded, Cut-To-Size/Furniture Panels, Drawer Sides/Backs Nosed/Grooved
At Timber Products Company we have a laser focus on every detail that goes into manufacturing the highest quality wood panel products. Our goal is to provide you with unparalleled solutions and extraordinary panel products that define a room and its elements. Nothing compares to the timeless beauty of natural wood.
Hardwood plywood stock panels are manufactured in standard sizes such as 4’ x 8’ or 4’ x 10’ and are commonly 1/4” to 3/4” in thickness. Stock panels are available through distribution centers for industrial users or through mass merchandisers for commercial and do-it-yourself customers. Frequently cut to component size by the end user.

- Consistent quality.
- Diverse selection of species.
- Strong and dimensionally stable.
- A variety of cores: veneer, MDF, particleboard, lumber, and combination core.
- Can be obtained finished.

ROTARY HARDWOOD VENEERS

• The grain pattern varies from log to log, making each piece its own natural unique piece of art.

• Wide variety of species available.

• Maximizes the usable veneer taken from each tree.

• Ability to select a specific flitch or “look.”

• By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: Facts About Decorative Veneers listed in the Table of Contents.

SLICED HARDWOOD VENEERS

- Beautiful heart structure.
- Uniformity of appearance.
- Smooth surface.
- Ability to select a specific flitch or “look.”
- Wide variety of species available.
- Sliced veneer gives a unique and sophisticated touch to your product.
- By using hardwood veneer, you honor centuries of craftsman heritage and contribute to an environmentally responsible use of a natural resource.

For more information, read: *Facts About Decorative Veneers* listed in the Table of Contents.

AKZONOBEL WOOD COATINGS (FINISHES & ADHESIVES) (M)
AkzoNobel creates everyday essentials to make people’s lives more liveable and inspiring. As a leading global paints and coatings company, we supply essential ingredients, essential protection and essential color to industries and consumers worldwide. Backed by a pioneering heritage, our innovative products and sustainable technologies are designed to meet the growing demands of our fast-changing planet, while making life easier. Headquartered in Amsterdam, the Netherlands, we are present around the globe, while our portfolio includes well-known brands such as Dulux, Sikkens, International and Interpon. Consistently ranked as a leader in sustainability, we are dedicated to energizing cities and communities while creating a protected, colorful world where life is improved by what we do.

AkzoNobel Wood Finishes: for nearly 200 years, the world’s leading manufacturers of cabinetry, furniture, building products and flooring have depended on AkzoNobel Wood finishes to beautify and protect their products.

AkzoNobel Wood Adhesives, a division of AkzoNobel Wood Coatings: for over 80 years, we’ve provided the innovative and market-leading wood adhesives.

Adhesive Types:
- Urea Formaldehyde
- EPI
- Phenol Resorcinol Formaldehyde
- Melamine Formaldehyde
- Melamine-Urea Formaldehyde
- PVAc: Type I, II, III
- PUR

Applications:
- Assembly gluing
- Boat (marine uses)
- Edge gluing
- Exterior and interior plywood
- Film and paper overlays
- Finger jointing
- Flooring
- Flush doors
- I-joists

Franklin Adhesives & Polymers (M)  
For 75 years, Franklin Adhesives & Polymers has been the industry leader in bonding wood and wood products. Manufacturers in more than 60 countries trust Franklin’s products to provide them the productivity and quality they demand. Their customers know they can rely on their longstanding experience and deep commitment to the development of practical, hardworking solutions that meet real needs on the plant floor. Many of Franklin’s brands—Titebond, Multibond, and Advantage—have become renowned in the manufacture of wood products, in assembly, edging and facing, laminating, veneering, and finger jointing. The unmatched breadth of their adhesive product line offers Franklin’s customers the performance characteristics they seek. Whatever you might be running in your plant, call Franklin Adhesives & Polymers and see for yourself what makes them the most trusted adhesion company in the world.

MEINAN MACHINERY WORKS, INC. (M)
Meinan develops and manufactures innovative machinery for veneer and plywood production, holding hundreds of worldwide patents. Meinan changed the basic engineering concept of veneer peeling with its revolutionary lathe, using spiked disks to drive logs on their circumference, providing better veneer quality, higher yield, and extremely close thickness tolerance. The lathe is part of an automatic veneer peeling line with significant labor cost savings. The newest line features the world’s first in-line green veneer composers for joining random width green veneer to improve dryer utilization. Meinan also manufactures scarf composers, grading systems, automatic layup lines, and sanders. Represented in USA by Merritt Machinery, LLC.

SOLENIS LLC (M)
Solenis is a global leader in specialty chemical solutions for consumer and industrial markets. The company’s Soyad™ adhesive technology is a patented, bio-based, formaldehyde-free adhesive system that is widely used to manufacture environmentally-friendly hardwood plywood and engineered wood flooring. Soyad™ adhesives are used to produce boards with veneer or composite panel cores. The strength provided by Soyad™ adhesives is comparable to that of formaldehyde-based adhesives. Soyad™ adhesives are cost competitive with formaldehyde-based adhesives and, in most cases, cost less than other no-added-formaldehyde (NAF) technologies.

Soyad™ Adhesive Technology
Going eco-friendly is easy with Solenis’ bio-based adhesives.

Meet the growing demand for environmentally-friendly interior wood products with Soyad adhesives. Formulated with natural soy flour and a proprietary cross-linking resin, these proven adhesives provide a strong, water-resistant bond and readily replace UF-based adhesives in hardwood plywood panels. Stay ahead of the growing demand for improved indoor air quality and bio-based materials – go with Soyad adhesives.

- 70-90% bio-based content
- No-added-formaldehyde (NAF)
- Cost competitive
- TSCA Title VI compliant

Enabling Engineered Wood Products

Innovative Solutions for the Engineered Wood Products Industry.

Hexion is a world leader in supplying resins, adhesives, wax emulsions, and ancillary products to the engineered wood and hardwood veneer products industries. We meet the most challenging applications with a complete package of innovative, cost-effective solutions. We’re also at the forefront in developing environmentally suitable technologies for reduced emissions.

Product Lines
- Urea Resins
- Melamine Resins
- Phenolic Resins
- Phenol-Resorcinol Resins
- PVA Adhesives – Conventional and Cross Link
- Casein Adhesive
- EcoBind™ Ultra-low Emitting Resin and Adhesive Technologies
- EPI Adhesive
- HRA Technology (Heat Rated Adhesives)

Applications
- Veneer Splicing
- Composite
- Panels
- Hardwood Plywood
- Furniture
- Laminating
- Saturating
- All Woodworking Applications
- Fingerjointing – Structure and Non-structural Adhesives

Sales Offices
- Alexandria, LA +1 318 445 6115
- High Point, NC +1 336 884 8918
- Portland, OR +1 503 286 3653
- Springfield, OR +1 866 443 9466

IT’S COLUMBIA LIKE YOU’VE NEVER SEEN US BEFORE.

You’ve known us as a leading supplier of hardwood veneer and plywood. We invite you to know us for the other capabilities, materials and solutions we’re bringing to all corners of the wood processing and wood working markets.

**Columbia Platforms**
- Assembled in the USA and Canada
- FSC® Mix available on request [FSC-C017500]
- TSCA Title VI compliant
- Available in a range of thicknesses, widths & lengths as well as cross-grain, long-grain, and unidirectional.
- Domestic and import core options to meet various price points

**Pachaco/Gmelina Core Veneer**
- Columbia Forest Products is the plantation manager, manufacturer, sales agent, and importer of record
- Meinan® Lathe Core Veneer
  - Strict and reliable thickness tolerances
  - Quality of cut delivers consistently smooth veneer
  - Gangi drive results in flexible veneer with less tension
- Optimized planting and harvest schedule for long-term growth and reliable fiber supply

**Rice Straw MDF**
- Manufactured in California
- Formaldehyde-free
- Revolutionary fiber source from a 25-mile radius around the state-of-the-art production facility
- 2mm to 30 mm thicknesses
- Densities from Ultralight to HDF

Danzer is close to you, and close to the source. Our experts understand their business and know where to procure sustainable hardwood that is right for you. We are committed to your specific needs and provide you with tailored solutions that ensure your success every time. www.danzer.com
