100TH ANNIVERSARY

TAIHEI

MACHINERY WORKS, LTD
TAIHEI MACHINERY US INC.

Taihei's innovation is the
foundation of your future success.

The Taihei P25-AB Horizontal Hot Press was
invented to eliminate the drawbacks of vertical hot
presses. The benefits:

- Ideal, uniform pressure enables the production of high-quality plywood
- Minimal reduction in thickness increases production yield
- Up to 200 kinds of plywood can be produced with its one-touch operation
- Handles many multiples of stacks, significantly increasing production per unit
- No need for a foundation pit, reducing foundation construction costs
- Heat plates move horizontally, reducing energy costs
- The IRETARO automatic infeed device and automatic stacker provide for fully automated operation

As of 2024,
Taihei Machinery
Works achieved
a 100% share of
deliveries to major
plywood mills in
Japan. The first
P25-AB Horizontal
Hot Press in North
America was
delivered in 2019.
